

The SWCD rents the roller-crimper to area producers within a 30 mile radius of the SWCD Office in Newport, Indiana.

The Vermillion County SWCD purchased the roller-crimper for use by area producers looking for an alternative to herbicide termination of cover crops, particularly, cereal rye in the spring.

The purchase was made in conjunction with a Clean Water Indiana Grant that serves both Parke and Vermillion Counties. The grant provides conservation tillage and soil health consultation to area producers who need more support in converting cropland or increasing the amount of cover crop acres.

### Rental Details

- First Come, First Serve Basis
- Priority given to Vermillion and Parke County Producers
- \$50 one (1) time use fee payable upon scheduling
- \$2 per acre used

Used as an alternative to herbicide termination of cover crops, roller-crimping provides a natural mulch to protect the soil and conserve soil moisture.
